

Welcome to our new website!

We have been spent the last 3 years continually improving our wonderful centre and decided it was time for our website and logo to have a revamp as well. We hope you like it. Below are some of the changes we have made in our outdoor areas.

Before

The top of our preschool playground we had a rockery area.

After

This is now covered in soft fall bark so the tamariki can use this area to create, climb and explore. The garden has been planted with flaxes bordered by wave height posts and filled with stones.

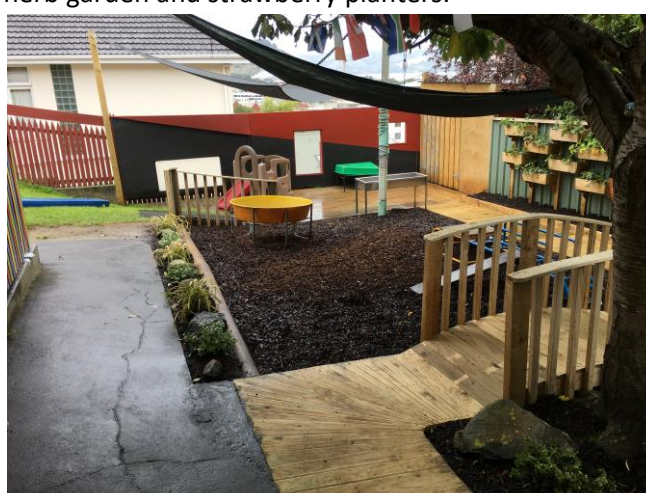

Before

Our nursery playground on a wet day was not so user friendly and we had to get out our wet weather overalls more often than we would like.

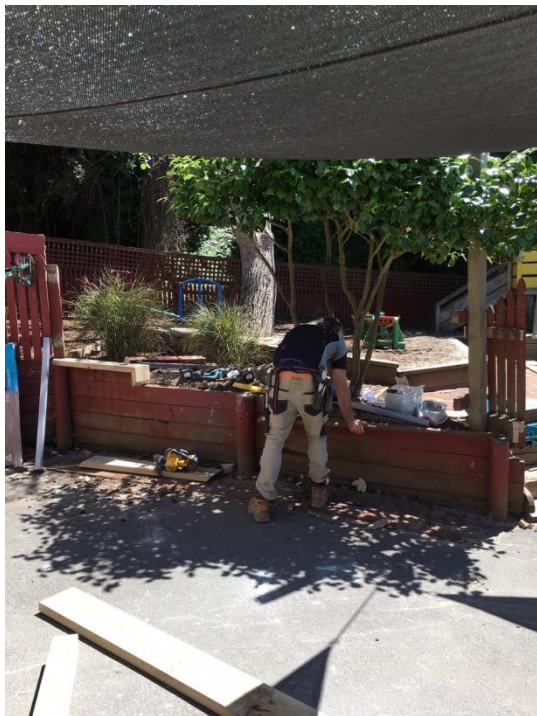

After

We have moved our shed to create a decked area complete with chalkboard fence and perspex windows. The boardwalk is great for crawlers as well as for using as a bike track. We have a vege garden, herb garden and strawberry planters.

Before

Removing the old fence panels.

After

The new glass fencing and staircase to open up the area visually.

Our builder hard at work creating a vegetable garden and path.

We have three little helpers that are always on hand in the weekends making trips to get supplies and learning the trade.
